Reading your Transfer Credit Evaluation...

Transfer Student Services evaluates all domestic and international college level transfer work for our undergraduate students. Hours and grade point average (GPA) are calculated according to SIU policy and posted to your record within 24 hours of our receiving your transcript. This information is used by Undergraduate Admissions and the academic program to determine admissibility to the University and/or the program. Once you have been admitted you can expect a full evaluation of your transfer work generally within 3-5 business days. There are a few times during the year that the volume of work will delay this process by a few days. Below is an example of what you can expect to see on your Transfer Credit Evaluation report. This report will always be your most current (within 24 hours) evaluation and will include all transfer work.

Please note the date the report was printed. This will always be the most recent evaluation and will include all transfer work. You will want to check it to make sure all sources of transfer credit are accounted for. We've also included your catalog year because this code determines what your degree requirements will be.

Catalog Year Code: 2001320 = Spring 2013, 201340 = Summer 2013, and 201360 = Fall 2013

At the end of the report we give you the Overall GPA, Awarded and Quality Hours. This is cumulative for all transfer work only.

Each source (school) of transfer work is presented separately along with the GPA, Awarded Hours, and Quality Hours.

If you have any kind of proficiency credit (AP, IB, CLEP, DANTES) or Military credit you will see that credit on this report too. We only post proficiency exams for which credit will be received.
